

- Inform those who have little to no knowledge about farming/ food production
- Provide useful and local data that is relevent to consumers
 - Give tips to a successful harvest
 - Provides pest threats
 - Provide popular dishes

Our Strategy

- Inform those who have little to no knowledge about farming/ food production
- Provide useful and local data that is relevent to consumers
 - Give tips to a successful harvest
 - Provides pest threats
 - Provide popular dishes

Goals

- Promote healthier eating and sustainability by providing popular dishes with self-grown and not processed foods
- Show the general population the advatanges and accessibility of farming
- Lessen contribution of greenhouse gases from food industry transportation
- · Improve resource management
 - people make what they need and not more.
 - everyone has the knowledge to make what they need
